# Scale-Link™
Wireless

The industry standard take-off tool for entering linear measurements from your blueprints, maps, or plans into any Windows program. Just roll the scaler wheel along your print, then click to instantly transfer the measurement into your program. Scale-Link Wireless contains everything you need to get started. The included PlanWheel can be used remotely in the field or interfaced with your PC at distances of up to 25 feet!
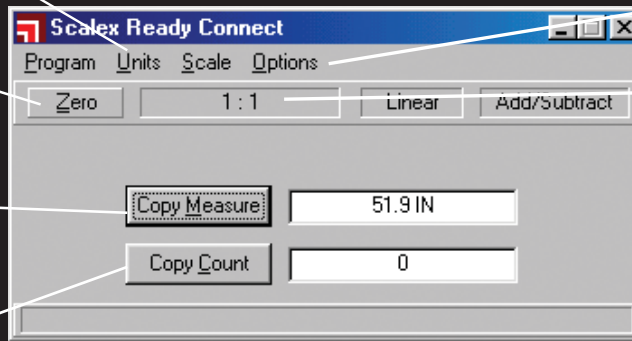

Select units of readout (inches, feet, yards, meters, etc.)

Zero the count and length
